## PPG MVP VIRTUAL LEARNING SESSION

### ESTIMATING DESTRUCTIVE WELD TESTS

Welding certification has become a requirement for collision repair technicians and shops. OEM's and I-CAR have specific procedures for test welds and destructive testing of welds prior to welding on vehicles. What training have estimators had to support their ability to write estimates that include destructive weld tests? Knowing what is involved with this OE specified procedure is the only way to determine the appropriate labor & material entries. Even then adding the line and the time needs supporting documentation to justify the line. Estimators should be able to discuss the process of destructive weld testing professionally and confidently. This session is designed to better equip estimators with the knowledge and skills for estimating destructive weld tests.

**Date:** August 19, 2020

**Time:** 4:00 PM - 5:00 PM EDT  
*Eastern Daylight Time*
