Keep Your Car Looking its Best with these Essential Tips

**Car
Care
Month**

1

Fix Chips & Scratches – Prevent rust by touching up small paint damage. Touch them up quickly with OEM-matched paint.

2

Wash Right – Use pH-balanced soap, microfiber mitts, and wash top to bottom. Touchless washes are safer; traditional brushes can cause swirl marks and micro-scratches.

3

Clay Bar for Smooth Finish – Restore dull paint with a treatment removes embedded contaminants that washing alone won't remove. Do this every 6 months for a glass-like smooth finish before waxing.

4

Use Paint Sealant for Extra Protection – Unlike wax, sealants offer longer-lasting protection—up to a year.

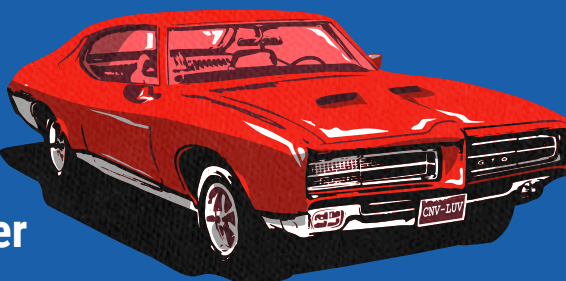

5

Did you know? Bugs, bird droppings, and tree sap can permanently damage your car's paint! Regular waxing and ceramic coatings help protect your car's finish.

Stock Up with SIX Essential Detailing Products This Month:

- ✓ ph-Balanced Car Shampoo
- ✓ Microfiber Towels
- ✓ Clay Bar
- ✓ Quality Wax or Coating
- ✓ Scratch & Swirl Remover
- ✓ Spray Detailer
